Carbon Reduction Plan Template

Supplier name: OneMedicare

Publication date: 14th July 2023

Commitment to achieving Net Zero

OneMedicare is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 1st April 2022 to 31st March 2023	
Additional Details relating to the Baseline Emissions calculations.	
Alongside this report we have published a fuller report on our website at www.onemedicalgroup.co.uk which outlines where we have and have not been able to fully access data to report on.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e) 83.84 tonnes CO ₂ e 5.56 tonnes mixed waste diverted from landfill 19.90 tonnes of confidential waste sent for recycling £347,758.37 spend on unidentifiable 'service' and 'utility' charges
Scope 1	N/A We have no Scope 1 activities/emissions to report

Scope 2	55.7 tonnes CO_{2e}
Scope 3 (Included Sources)	28.14 This number includes Travel, Commuting, and Water
Total Emissions	83.84 tonnes CO_{2e} (NB. See also above)

Current Emissions Reporting

Reporting Year: Our current year is our baseline year.	
EMISSIONS	TOTAL (tCO_{2e})
Scope 1	As above
Scope 2	As above
Scope 3 (Included Sources)	As above
Total Emissions	As above

Emissions reduction targets

OneMedicare is committed to reaching Net Zero by 2045. To do this, we will start by decreasing our carbon footprint by 10% year-on-year for the next five years.

Note: Over this second year of reporting we will work with suppliers and landlords to gain better data and be able to report a fuller footprint. This means that although we will try to show a reduction in areas such as miles travel and fuel card spend, we may show an increased footprint in 2024.

Progress against these targets can be seen in the graph below:

Nothing to report as yet as initial programme of works currently underway.

Carbon Reduction Projects

The following environmental management measures and projects have been completed or implemented since the 2022 to 2023 baseline.

- Establishment of an ESG Team
- Training incorporated in our new starter documents and induction
- Group Board commitment to working in line with, and towards ISO 14001 (Environmental Management System Standard)
- Objectives forwarded to Group Board for sign-off and roll out internally and externally
- Report published on www.onemedicalgroup.com and company intranet

In the future we hope to implement further measures such as:

- Working with suppliers to increase vigour in the data provided to us and enabling us to fuller understand our carbon footprint.
- Working with our landlords, particularly in multi-purpose/multi-occupancy buildings in order to get better data around our energy, water and waste footprints.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
